ABOUT VASTUKALP

Vastu Shastra is a traditional Indian system that guides the design and arrangement of spaces to promote harmony, well-being, and success. By aligning our surroundings with natural energies, it helps improve health, relationships, and financial stability. When applied correctly, Vastu creates balanced environments in homes, offices, and even larger spaces like commercial or industrial setups.

With over four decades of experience, Vastukalp has been simplifying Vastu for modern lifestyles. Their approach focuses on practical solutions that don’t require structural changes, making it easy for anyone to benefit from Vastu principles.

Renowned Vastu expert Mr. Vimal Jhajharia, together with his father Mr. Nand Kishore Jhajharia, introduced the innovative concept of “Remedies without Demolition.” This unique method has positively impacted countless lives and gained global recognition. Today, Mr. Vikas Jhajharia carries forward this legacy, helping people create spaces filled with positivity, growth, and harmony.

VASTU TIPS

- A window on the West side of the bedroom can impact well-being, so it’s advisable to keep it covered with curtains or closed when needed.
- Toilets located in the East of a bedroom may lead to health issues; keeping the door shut helps minimize negative effects.
- If the East zone of the home or bedroom is blocked, it may affect relationship harmony; placing a rising sun image in the East can help restore balance.
- Keep money, jewellery, and valuables in the South direction, preferably wrapped in a red cloth, to encourage financial stability.
- Students should sit facing East while studying, as it is believed to enhance focus and mental clarity.
- Maintain a clean and organized puja room; avoid placing multiple idols or images directly in line behind one another.
- Refrain from placing images of gods or ancestors on the wall just behind your bed or workspace.
- For sound sleep and stability, position your head towards the South or West while sleeping.
- Water elements like fountains or aquariums should ideally be placed in the North or North-East, and water should be kept fresh.
- Electronic items like televisions are best positioned in the North or East for balanced energy flow.
- Keep all areas of your home clutter-free, as mess can lead to reduced positivity and decreased productivity.
